**Approvals for Confluence is the ultimate review tool that streamlines document approvals without leaving the platform. Say goodbye to endless email chains and manage reviews directly in Confluence.**

Use Cases

Upgrade your team's document review and approval process within Confluence, enhancing collaboration across all departments.

- **Streamline content review:** Enable designated team members to efficiently review and approve all in one place.

- **Ensure policy compliance:** Maintain adherence to internal document management policies and procedures.

- **Enhance document quality:** Improve quality control through structured approval workflows.

- **Collect expert feedback:** Quickly gather and incorporate expert feedback to keep projects progressing.

For more information about Approvals use cases, please refer to our documentation: **Cloud | Data Center.**
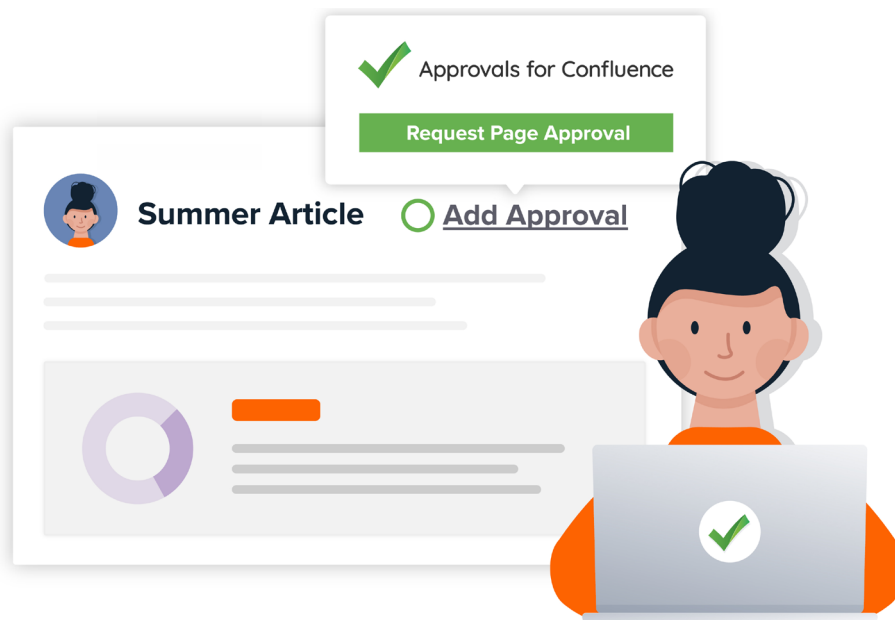

> 💡 **Note on Approvals:** Approvals for Confluence streamlines the review process with an intuitive interface, enabling immediate use by any team members. For more comprehensive workflows, consider Workflows for Confluence, offering tailored document management solutions.

Benefits

Approvals for Confluence streamlines document reviews with an intuitive interface, providing teams with:

- **Centralized management:** Oversee all approvals within Confluence, eliminating information silos and enhancing the visibility of the status of all reviews in the approval search table.

- **Instant approval requests:** Initiate document approvals swiftly with a user-friendly interface.

- **Tailored review processes:** Customize approvals to align with your team's policies and procedures.

- **Seamless feedback gathering:** Gather and view stakeholder input directly in context, facilitating prompt document updates.

- **Quick setup:** Get started immediately without a complex setup, making the approval process seamless for all technical and non-technical team members.

Don't just take our word for it

"Great app and very responsive team. We use it to approve documents required for computer system validation. Very helpful is the fact that approvals can additionally be saved as comments on the document."

Ramon Saccilotto
