Workflows for Confluence is a game-changing document management solution that brings consistency, structure, and compliance to your Confluence content. It revolutionizes how content is created, managed, approved, and published, seamlessly aligning with your organization's workflow.

Use Cases

Enhance your team's document review and approval process within Confluence, enhancing collaboration across all departments.

- **Streamline content review:** Enable designated team members to efficiently review and approve all in one place.

- **Ensure policy compliance:** Maintain adherence to internal document management policies and procedures.

- **Enhance document quality:** Maintain consistency and streamline approvals with structured workflows. Automate actions like publishing and create custom workflows for each team.

- **Collect expert feedback:** Quickly gather and incorporate expert feedback to keep projects progressing.
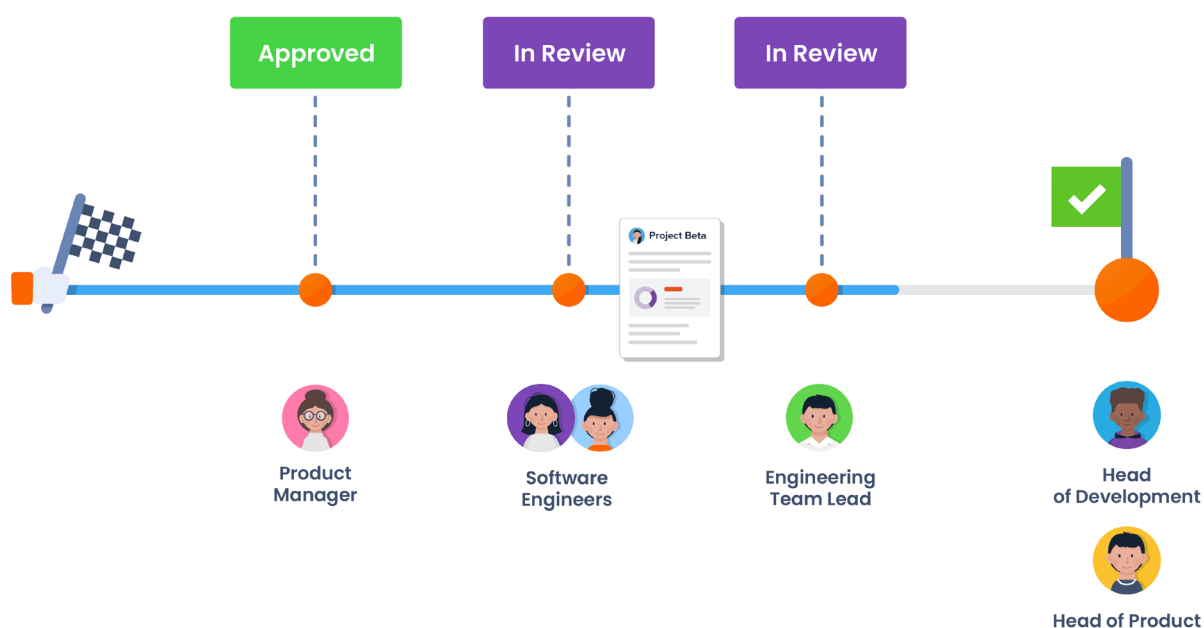

By using Workflows for Confluence, you can build custom-made workflows that support t different documents, projects and teams in your business and use them throughout your Confluence

For more information about Workflows use cases, refer to **our documentation**.

Benefit

Workflows for Confluence makes it easy to create and customise workflows that keep your team on track and projects moving forward without roadblocks. With Workflows, you can:

- **Design tailored workflows:** Create and tailor processes to fit any document, project, or team.

- **Build with ease:** Use Workflows immediately with an intuitive, no-code, drag-and-drop editor.

- **Maintain control:** With Workflows, only admins (site and space) can create and edit or delete workflows.

- **Streamline approvals:** Create single or multi-stage review processes that align with your policies.

- **Automate tasks:** Incorporate trigger-based actions like publishing content, setting page expiries, creating official versions, and sending emails to enhance efficiency.

- **Enhance compliance:** Use audit logs, control tables, and metadata macros to meet standards like ISO 27001, ISO 9001, HIPAA, MDR, and NIST.

Don't just take our word for it

"In my opinion the best workflow engine for Confluence Cloud. The support and developers are really fast and product ideas I had, were being included to the upcoming releases. Very good interaction with the customer!"

Lars Swart

Feature Comparison

Workflows for Confluence offers customizable actions for teams of any size. For a simpler alternative, consider Approvals for Confluence. See the feature comparison below:
